**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8,14-20,26-29 are, drawn to Software receiver, classified in class 375, subclass 316.
  - II. Claims 9-13,21-24 are, drawn to PRN code generator, classified in class 708, subclass 256.
  - III. Claim 25 is, drawn to Tracking PRN code, classified in class 375, subclass 134.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of group I, II and III have different functions and operations.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III; and the search required for Group II is not required for Group I and III, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Erlich Jacob on 10/15/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
